

# FROGGING

WITH DR JEANNE TARRAT

## LET'S LEARN ABOUT OUR LITTLE AMPHIBIAN FRIENDS

Jeanne Tarrant, aka the “Frog Lady”, has worked in amphibian conservation and research for 18 years. Her passion for amphibians was ignited when she enrolled at North-West University in 2006 and went on to complete an MSc (2008, cum laude) and PhD (2012) through the African Amphibian Conservation Research Group. Thereafter, she conceptualised the Endangered Wildlife Trust’s Threatened Amphibian Programme (TAP) and ran successful projects across South Africa focused on the country’s threatened frog species for 12 years. In 2024 she embarked on a new amphibian-focused venture in the form of Anura Africa.

We are thrilled to have her join us to lead this event.

DATE: 6 MARCH

TIME: 5:30PM

VENUE: LOWER VIRGINIA BUSH

COST: R100
